ALUMINUM FISHING BOATS

24

More than one hundred years and five generations in pursuit of our passion.

Tradition begins with the family.

We're not just boat builders. We're boaters, just like you. For five generations and counting, our family has been dedicated to sharing the wonder of boating by creating the finest watercraft that money can buy. That's really all there is to it.

Smoker Craft can trace its roots in the boating industry all the way back to 1921, when the Smoker Lumber Company, as it was then called, was a world leader in the production of oars and paddles. We also built many of the wooden components used in boats produced by several different brands. So in 1963, we built on those four decades of experience and began making boats of our own.

ventilates storage compartments so that gear put away wet doesn't stay that way. Our history is one of constant innovation, and that only results from spending time on the water.

While our designs have evolved over the years, what has remained constant is the painstaking care and meticulous attention to detail that goes into crafting every single one of our boats. Many of our more than 700 employees have been with us for 30 years or more, and their skill and craftsmanship is unmatched in the industry.

We love boating, and we want to share it with the world. That is our commitment. That is our heritage.

Cinda McKinney,
Susan Graff,
Sara Barrett and
Peter Barrett

President
Doug Smoker
with grandson
Henry Smoker

Although most boats at that time were made entirely from wood, we chose aluminum for its light weight, great strength and maintenance-free durability. Then we added our own innovations, like our Performance Hull System and our acclaimed Hydra-Lift reverse chine hull, our pinch-free seating that protects stray fingers and fishing rod tips from harm, retractable cleats to avoid snagging fishing lines or stubbing toes, and our revolutionary Yarblow system that

(L to R)
Phil Smoker,
Doug Smoker,
Peter Barrett

STANDING STRONG ON FOUR FOUNDATIONS.

Fishing isn't just something you do. It's part of who you are. So when it comes to choosing a fishing boat, second best won't do. That's why, for more than 100 years, Smoker Craft has pushed boundaries with our spacious interior layouts and industry-leading hull designs that deliver superior performance and fuel economy. That's why we continue to drive innovation with features like our Yarblow ventilation system that protects expensive tackle from rust and corrosion, our advanced FreshCatch and FreshCatch Pro livewell systems to keep the catch fresh all the way to the table or the tournament weigh-in, and our Integrated Gunnel Track System (IGTS) that lets you mount accessories anywhere without having to drill any holes. We get this stuff because we're anglers too. That's why we're constantly taking things to the next level with design, engineering and construction that deliver best-in-class aluminum fishing boats for every budget.

THE INDUSTRY'S BEST WARRANTY. PERIOD.

Only a company with the proven history and longevity of a brand like Smoker Craft can offer something like this:

- Limited lifetime warranty on hull and structure
- 6-year warranty on all components, carpet and upholstery*
- All parts and labor
- Transferable to second owner

LIVEWELLS

What's the point in having a livewell if you have to constantly fuss with it? Our FreshCatch Pro recirculating livewells use heavy-duty pumps and PowerStream aerators to move more oxygenated water through the tank and keep fish healthy. Just hit the timer and forget it, so you can focus on the fish below the boat — not the fish that are already in it.

BOW PLATFORMS

Our raised bow casting platforms are carefully designed to give you plenty of elevation for better visibility and more storage space, while maintaining plenty of interior depth for added safety and a dry ride in rough conditions. Our exclusive raked bow design gives you more interior space up front, allowing larger in-deck storage compartments for storing bulky items.

ROD STORAGE

Our rod storage spaces are designed to protect expensive tackle from damage while keeping it readily available for instant access. Select models feature lockable bow in-floor center storage that holds up to 12 rods securely in individual tubes.

CONSOLES

Smoker Craft deluxe consoles put everything you need just a glance away. Their ergonomic designs position gauges so they're clearly visible while running, and toggle switches are always within easy, unobstructed reach. Hydraulic steering comes standard or is an option on many models.

Separating ourselves from the pack

Since 1921, Smoker Craft boats have stood for continuous innovation, standing out from the pack with numerous key features that make a big difference out on the water. Designed by anglers for anglers, here's just a sample of what you'll find on our 2023 lineup.

C-ZONE DIGITAL WIRING SYSTEM

Simplify your boat's operation system with C-Zone digital wiring. C-Zone gives you complete control of all electrical functions with the touch of a button. From monitoring pump levels, battery levels and other critical functions, to optimizing the onboard environment via a multi-circuit switch, you can take your boat to the next level of performance and sophistication when you let C-Zone do the thinking.

Scan the code to learn more:

INTEGRATED GUNNEL TRACK SYSTEM

Smoker Craft's exclusive Integrated Gunnel Track System (IGTS) allows for easier installation of rod holders, downriggers and other accessories—without drilling a single hole anywhere in the boat. IGTS is the ideal foundation for factory-installed accessory packages from Scotty Fishing Products and Bert's Custom Tackle, developed by legendary fishermen to meet the individual needs of serious anglers. Ask your dealer for details.

CUP HOLDER
TOOL HOLDER
RISER/CRADLE
ROD TREE

YARBLOW VENTILATION SYSTEM

Standard on Adventurer Series.

Let's face it, on a fishing boat, gear sometimes gets put away wet. That's why Smoker Craft is proud to offer the exclusive Yarblow Ventilation System that circulates fresh air through rod lockers and storage spaces to protect expensive tackle from rust and corrosion. Pressurized air keeps mold and mildew from becoming established in storage compartments, as well as traditionally wet areas like the bilge, protecting your gear and the boat itself. It's all part of our commitment to providing peace of mind and giving you more value for your investment.

BLOWER
BATTERY CHARGER
VENT/AIR INTAKE
AIR FLOW

CONSTRUCTION YOU CAN COUNT ON.

UPHOLSTERY

Produced in-house for quality control and customization, Smoker Craft upholstery is precision cut and installed using only stainless, non-corrosive fasteners. Cushioning foam is biocide treated to help prevent mildew and fungal growth that can discolor vinyl. This process is a key differentiator when comparing Smoker Craft to other manufacturers.

CARPET & VINYL

Smoker Craft casting platforms and decks are covered in marine-grade carpet that is both glued and stapled, while cockpits feature easy-to-clean vinyl. Optional snap-in carpet can be added over the vinyl for added comfort.

EVA SOFT TOUCH TRACTION MATS

These mats are easy to clean; resistant to mold, mildew and stains; and offer superior wet or dry traction.

FLOOR PANELS

Our pressure-treated plywood floors are 5/8" in the cockpit and 3/4" on the casting decks. They carry a lifetime warranty and will not warp or rot.

INJECTED FOAM FLOTATION

Unlike other manufacturers, we inject foam flotation into pre-routed holes in the floor panels to fill the entire cavity under the floor. The adhesive property of our foam allows it to bond to both the floor panels and the hull, providing enhanced support and excellent sound dampening.

TWICE-BAKED PAINT FINISH

The Smoker Craft paint method includes 3 coats of base urethane and 3 coats of accent color, with baking under infrared heating coils after each step—giving it a twice-baked, diamond-hard finish that is resistant to chipping and fading, and looks great for years to come.

ZINC CHROMATE PRIMER

Zinc chromate primer is chemically etched into the aluminum hull, forming a corrosion-resistant surface. This also creates an even, bondable surface for the final paint layer.

HIGH-GRADE ALUMINUM

Smoker Craft boats start with 5052 H34 Cold-Rolled Aluminum for its superior strength, hardness and corrosion resistance. Computerized fabrication equipment delivers precision components and ensures consistent quality.

DOUBLE RIVETS

The sides and transom are riveted with a double row of airplane-style rivets on the seams on all models 17' and above. The rows are offset to completely seal the seam.

GENERATION 2 VERTEX PERFORMANCE STRAKE™ HULL

Available on the Adventurer and Excursion Series boats.

Smoker Craft's revolutionary Generation 2 Vertex Performance Strake™ (VPS) hull sets the standard for high performance in aluminum fishing boat design, providing unrivaled acceleration, unequaled handling and the highest ride quality in the industry.

Specially designed, integrated performance strakes mounted to the V-shaped hull feed nothing but clean, undisturbed water to the propeller for maximum bite. That means enhanced boat controls, greater bow lift and a quicker time to plane – even when running with less horsepower.

Break out to the big water, and you'll immediately feel the VPS difference, with its unprecedented stability and its higher, drier ride. That's something everyone can appreciate.

Middle level – Four 7' rods
Lower level – Four 6.5' rods

ONE PIECE HULL BOTTOM

BATTERY STORAGE
Placed mid-ship for better weight distribution

FAST DRAIN SYSTEM (FDS)

Our enhanced system quickly routes water from the main floor to the bilge through specially designed channels in the cockpit.

TOE KICKS

Toe kicks are strategically placed throughout the cockpit, providing top storage and additional safety.

FISHERMAN TOPS

Optional fisherman tops feature removable clear-view port and starboard visors. Plus, fast-open side curtains make it easy to reach outside for docking.

CONVENIENT STORAGE

Standard on Adventurer and Excursion Pro models, convenient storage compartments are perfect for Plano tackle trays and other fishing accessories.

FRESHCATCH

Our aerated livewells are timed for convenience and feature a PowerStream nozzle, a single bilge and black thru-hulls.

Standard on Excursion

FRESHCATCH PRO

Our pro livewells are aerated, timed and feature a recirculating pump to move more water and oxygen into the tanks to keep fish active. Highlights include black thru-hulls and PowerStream aerator and nozzle.

Standard on Adventurer

GENERATION 1 HYDRA-LIFT PERFORMANCE HULL

Our exclusive, proven-performance Generation 1 hull provides superior lift to get you out of the hole and on plane quickly. The reverse chine design keeps the bow down during acceleration, provides sportscar-style turning agility and offers exceptional stability both while running at high speeds and while at rest.

Generation 1 Hydra-Lift Performance Hulls are available on Ultima and Pro Angler XL Series boats.

TRANSOM

The transom board is made of 1.5" pressure-treated plywood, which is covered by our Limited Lifetime Warranty. The board is sandwiched between the aluminum transom with a plastic layer to prevent corrosion and a second aluminum sheet is anchored using stainless steel bolts.

PERFORMANCE HULL SYSTEM

Our exclusive Performance Hull System (PHS) is a completely customizable trim tab feature that increases speed, reduces pounding, eliminates porpoising and provides improved efficiency with less fuel consumption and engine laboring. The system allows you to tune your hull to maximize performance, depending on the weight and horsepower of your engine. Additional benefits include improved visibility, reduced wake size, better handling and less hull stress. *Not available on Adventurer series.*

SPRAY RAILS

Spray rails are rolled into the side panels, giving a much cleaner appearance and eliminating the line-breaking rough edges found on many other boats. The combination of spray rails with the Hydra-Lift reverse chine design delivers the driest ride in the industry.

YARBLOW VENTILATION SYSTEM

The exclusive Yarblow Ventilation System protects your tackle and gear from rust and corrosion by using pressurized air to eliminate mold and mildew in the bilge and dry storage areas. See page 5 for more details.

SIDE PANELS

The side panels are strengthened by rolling lap strakes into the aluminum, adding rigidity to the sides that prevents the "oil can" appearance of many other boats.

INTEGRATED GUNNEL TRACK SYSTEM

The exclusive Integrated Gunnel Track System (IGTS) is an innovative gunnel design that allows for easier installation of rod holders, downriggers and other accessories. See page 5 to learn more about this exciting new feature.

LED LIGHTING

Enjoy the added style, safety and convenience of interior LED lighting.

Because the hottest bite can be early in the day or well after dark, select Smoker Craft boats feature state-of-the-art LED interior lighting for added safety and convenience. Unlike traditional courtesy lights, LEDs draw very little power, and you'll never need to replace a bulb again.

GAS TANK INTEGRATION

We place the gas tanks below the floor toward the center of the boat, between the floor stringers, to centralize the weight of the fuel. This gives the boat a softer ride and helps keep the bow down.

ONE-PIECE BOTTOM

The Hydra-Lift Hull begins with a one-piece bottom, unlike many other manufacturers. Aluminum gauge ranges from .100" to .125".

The Hydra-Lift Hull is supported by Smoker Craft's exclusive Advanced Integrated Rib System (AIRS). This integrates heavy machine-formed, hat-shaped ribs in the bow with cross ribs on 10" centers on the bottom. The bow ribs conform to the contour of the bow and angle toward the cross ribs to add strength to the critical area of the hull when the boat is running. Floor stringers are fastened to the cross ribs to support the floor panels and enhance hull strength.

5-KEEL CONSTRUCTION

While many manufacturers have stopped adding keels, we continue to use up to 5 keels on our hulls to provide longitudinal strength and to protect the bottom when beaching or trailering. In addition, the keels help the boat plane quickly by breaking the water during acceleration. They also improve tracking and help maintain better boat control while fishing.

INNER STRENGTH

The legendary performance of Smoker Craft boats comes from the tremendous strength of their proven hull design. A precision-welded framework built on longitudinal stringers is directly secured to the hull plate to create a solid, uniform structure.

LEGENDARY HANDLING

Our exclusive Hydra-Lift Hulls incorporate our Advanced Integrated Rib System (AIRS) that reinforces the hull's critical running surface when underway. Apart from providing smoother planing performance, Hydra-Lift improves handling in all water conditions for a more pleasing ride and better fuel economy.

HIGH AND DRY

Hydra-Lift Hulls raised eyebrows when they were first introduced, and they continue to lead the industry today with their smooth handling and dry ride. The combination of spray rails rolled into the side panels and Hydra-Lift's reverse-chine design beat down spray and keep water out of the boat – something you especially appreciate when heading out on those cold mornings early or late in the season.

ADVENTURER

Excursion takes the best of our top-of-the-line models and packs it into a more compact footprint that is easy to trailer and even easier to afford. Excursion offers pro-level features like a deep cockpit, plenty of free board, a huge raised bow deck and ample rod storage. Plus, it is built on Smoker Craft's Vertex Performance Strake™ Hull for superior performance.

FEATURING C-ZONE DIGITAL WIRING SYSTEM

Simplify your boat's operation system with C-Zone digital wiring. C-Zone, standard on all Excursion series boats, gives you complete control of all electrical functions with the touch of a button. From monitoring pump levels, battery levels and other critical functions, to optimizing the onboard environment via a multi-circuit switch, you can take your boat to the next level of performance and sophistication when you let C-Zone do the thinking.

SYSTEM FEATURES:

Clean Dash

- Dash-mounted Waterproof switch Pad
- Can be Integrated with MFD

Simple Installation and Maintenance

LENGTH
16'2" - 16'10"

BEAM
81" - 92"

You cast for bass in the morning, troll for muskie at mid-day then jig for walleyes before heading in. Multi-species anglers need a versatile boat, and Pro Angler delivers. We're talking oversized, raised bow and stern casting platforms, a massive 25-gallon FreshCatch aerated livewell, lockable rod storage and an automotive-style console with full gauges and plenty of space for electronics. With its wood-free fishing seats and a heavy gauge .100" one-piece bottom, this is one fishing buddy that's in it for the long haul.

NORTH AMERICAN ANGLER

WHEN IT'S TIME TO BRING YOUR "A" GAME.

No matter where you love to fish, the American Angler Series by Smoker Craft is up to the challenge. Big water? Rough weather? These all-welded hulls are ready for anything with their exclusive Torsion Beam Construction built for exceptional strength and shock absorption—plus the peace of mind of a lifetime warranty.

THE INDUSTRY'S BEST WARRANTY. PERIOD.

Only a company with the proven history and longevity of a brand like American Angler by Smoker Craft can offer something like this:

- Limited lifetime warranty on hull and structure
- 6-year warranty on all components, carpet, upholstery and electronics
- All parts and labor
- Transferable to second owner

TWICE-BAKED PAINTED HULLS

American Angler full painted hulls provide showroom looks designed to last for years.

MACHINE FORMED RIBS*

Our unique machine formed ribs are stronger and more flexible than the two-ply aluminum used by many competitors.

TORSION BEAM CONSTRUCTION*

Instead of the flat I-Beams that you find in many boats, American Angler uses our exclusive Torsion Beam Construction (TBC) stringer system for exceptional strength and shock absorption.

ALL-WELDED CONSTRUCTION

Every American Angler series boat offers the toughness and reliability of all-welded marine-grade aluminum construction that's backed by a lifetime warranty.

INJECTED FOAM FLOTATION

American Angler models feature injected foam, not poured, between the floor and hull — filling all air pockets. This provides greater strength and buoyancy and reduces noise.

* Pro Lodge, Pro Tracer and Osprey series

Smoker Craft Livewell Options

From evening dinner to that coveted trophy fish, Smoker Craft's FreshCatch aerated livewells keep every catch safe and fresh.

FRESHCATCH

Our aerated livewells are timed for convenience and feature a PowerStream nozzle, a single bilge and black thru-hulls.

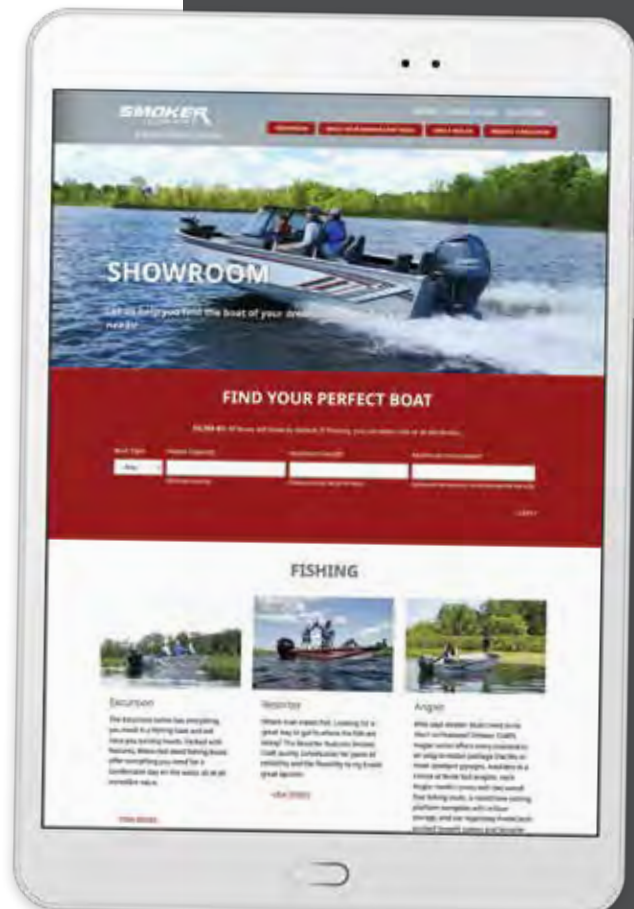

FRESHCATCH PRO

Our pro livewells are aerated, timed and feature a recirculating pump to move more water and oxygen into the tanks to keep fish active. Highlights include black thru-hulls and PowerStream aerator and nozzle.
